ENERGY

ENERGY > WE ARE A RECOGNISED LEADER IN THE INTERNATIONAL ENERGY MARKET, PROVIDING BESPOKE SOLUTIONS AND AN UNRIVALLED SERVICE TO CLIENTS

Chris White
Head of Energy
Division

OUR PORTFOLIO

Upstream Energy

We are a market leader in this class.

The account comprises operating and construction risks, which we insure for clients worldwide, including state-owned energy, multinational and independent companies, drilling contractors and shipyards.

We cover offshore platforms, mobile offshore installations, pipelines and sub-sea completions, onshore rigs, contractors equipment and other energy assets. The protection offered includes physical damage, business interruption, control of well and seepage and pollution.

Midstream, Downstream and Renewables

We participate on mid and downstream business, both in conjunction with existing upstream risks and on a standalone basis. The midstream account includes gas separation plants, LNG facilities and gas storage, while the downstream account covers refineries and petrochemical plants. The protections offered include physical damage and business interruption.

We offer insurance for renewable energy sources including bio fuel plants and on and offshore wind farms. We can provide construction coverage for these risks.

Energy Casualty

We offer liability coverage for packages and on a standalone basis. We also protect, on a primary and/or excess of loss basis, assets covered by our up and midstream accounts.

We write all lines of business through our offices in Singapore and Copenhagen, Denmark.

CHAUCER HOLDINGS PLC

Chaucer Holdings PLC is a specialist insurance and reinsurance Group. We underwrite business at Lloyd's, the world's leading insurance and reinsurance market. We have offices in the UK, Europe and Singapore.

Our business

We have a well-diversified book of business, balancing global marine, energy, non-marine and aviation classes with a UK motor business and nuclear insurance.

Our strategy is to be a leading Lloyd's insurer.

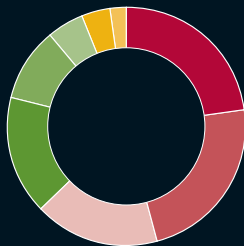

At the core of our business are Chaucer Syndicate 1084 and Nuclear Syndicate 1176, which together have an underwriting capacity of over £650m for 2009.

Our syndicates employ specialist underwriters in 28 major classes of business.

Our underwriters work hard to place themselves uppermost in the thoughts of brokers seeking to place or renew business. We are committed to increased underwriting leadership. We support underwriting with a highly qualified and professional claims team, which has extensive Lloyd's marine and non-marine claims management experience.

We are also market leaders in syndicate management, which provides a practical solution for investors seeking a Lloyd's presence but not wishing to have a standalone managing agent.

Business mix 2009

■ 23% Property	■ 10% Specialist Lines
■ 23% Motor	■ 5% Aviation
■ 17% Marine	■ 4% Nuclear
■ 16% Energy	■ 2% Europe
